## Biography

Peter Barnes Martin is a full-time singer-songwriter and jazz musician from Rochester, New York, based out of Monterey, California. His music styling is influenced by the indie folk, alternative and jazz genres and can be compared to artists such as Benny Sings, Kings of Convenience, Iron and Wine, Jack Johnson, Tom Misch, and Chet Baker. Peter's act is characterized by its improvisational intensity, seasoned performance experience, and laid-back stage presence, which he draws from his time spent touring throughout Michigan and the Carolinas with the Joseph Herbst Sextet and his work as a professional jazz musician in New York City.

In March 2023, Peter self-released his debut album, 'Anywhere is Home,' and subsequently promoted it over a 10-date tour spanning from San Diego, California to Seattle, Washington. In addition to this tour, Peter has been actively performing in California, with 166 total gigs in 2023. In 2024, Peter is driven to continue working on his second album, "The Lake", and expand his already busy performance schedule to new festivals and venues looking to create spaces for emerging artists.
